CAREER OBJECTIVE:

React Web Developer focused on creating user-centric web applications that deliver smooth experiences. Looking to join a team where I can actively contribute to real-world projects and help enhance user satisfaction through innovative solutions.

WORK EXPERIENCE:

Intern in Gatetechs

3 months (ongoing)

- Worked on various tasks and projects assigned by the company.
- Company LinkedIn Profile: <https://www.linkedin.com/company/gatetechs/>

Participant in Digital Egypt Pioneers Initiative

(DEPI) Ministry of Communications and
Information Technology

- Participated in a structured training program focusing on web development skills and essential technologies.
Learned multiple technologies: HTML, CSS, JavaScript,tailwindcss,bootstrap,React

PROJECTS:

Brigge E-Commerce: A practical eCommerce training project built with React, simulating a real online store based on a design provided by a training company. The project uses dummyJSON as a fake API to display and manage products. Implemented user authentication using Firebase to enhance security and user management.

- **Key Features:**
 - Multi-language support using i18n.
 - Product image zoom feature with a dedicated library.
 - Stripe payment integration in Test Mode.

- **Technologies Used:** React, i18n, TailwindCSS, Stripe, Firebase, dummyJSON API.

This project was a great opportunity to practice integrating modern tools and libraries into a complete eCommerce application.

Check out the project link here: <https://brigge-ecommerce.netlify.app/>

Company Portfolio Website: Developed a responsive portfolio website for Gatetechnics during my internship. The site showcases the company's services and projects, featuring a dynamic projects section, Ninja Forms for contact and inquiries, and a dynamic typing effect on the homepage.

- **Technologies Used:** WordPress, OceanWP, HTML, CSS, Ninja Forms, Dynamic Typing JS.
- Built using WordPress with the OceanWP theme for a clean, modern design and optimized user experience.

Check out the project link here: <https://portfoliotest.infinityfreeapp.com/>

Static Media Website: Developed a static website using HTML, CSS, JavaScript, and Bootstrap. The project was handed over as a fully static front-end, and the backend team handled embedding the dynamic data directly into the static files (data injection during build) to populate the content.

- **Technologies Used:** HTML, CSS, Bootstrap, JavaScript.

Check out the project link here: <https://mediaelzekarrah.netlify.app/>

Social Media: Developed a social media platform where users can create profiles, share posts, and add comments on others' posts. Implemented a complete CRUD system for managing content, along with features like user authentication, etc..

- **Technologies Used:** HTML, CSS, Bootstrap, JavaScript.

Check out the project link here: <https://social-minni.netlify.app/>

Prayer Times Website: Developed a website that displays

accurate prayer times based on user location. Enables users to select their city and view corresponding prayer times through a user- friendly interface.

- **Technologies Used:** HTML, CSS, Bootstrap, JavaScript, and prayer times api : <https://aladhan.com/prayer-times-api>

Check out the project link here: <https://prayer-timess.netlify.app/>

CRUD Operations Website: Developed a website that enables users to perform CRUD (Create, Read, Update, Delete) operations on a set of data through a user- friendly interface. Users can add, view, edit, and delete items, providing a dynamic experience for managing data.

- **Technologies Used:** HTML, CSS, React, TypeScript, TailwindCSS, Headless UI, and Tailwind UI for styling and building interactive components.
